January 5, 2006

Sir:

This is in response to the Office Action mailed October 5, 2005, in connection with the above-identified application.

Claims 1-3, 5 and 7-11 stand rejected under 35 U.S.C. 102(a) as allegedly being anticipated by International Publication No. WO 02/31314 (to which the Examiner refers as "WIPO '314"). Applicant traverses this rejection and requests reconsideration thereof.

The present invention relates to a controlled-pressure drop liner device. As shown, by way of example only in Figure 1, the device includes a circumscribed filter element 9 centered on a base tube 1 by longitudinal braces 14 in relation to the axis of the tube (see Figures 3 and 4) and arranged according to the diameter of the tube so as to divide the annular space defined by the filter element and the tube into sectors delimited by the braces 14. Collecting tubes 5 are arranged and open into the sectors by one end. The collecting tubes 5 have another end operably
